

MO PO Closeout

MO PO Closeout

MO PO Closeout was designed to dramatically simplify the process of closing out manufacturing orders and purchase orders in Infor XA. Traditionally, closing out manufacturing orders and purchase orders required users to do a number of steps and navigate a number of screens. MO PO Closeout was designed to put all pertinent information on a single screen and greatly reduce the number of steps needed to close out an order.

MO PO Closeout...

- **Reduces the time, effort and steps required to close out manufacturing orders and purchase orders**
- **Eliminates non value-add activities associated with maintaining orders**
- **Simplifies user training for new and existing users**
- **Puts vital order information in a single, easy to read screen**
- **Increases order accuracy**
- **Improves inventory accuracy**
- **Automatically closes open routing operations**
- **Clears TRDATA transactions in Production Monitoring and Control**
- **Reconciles labor and material by operation**

MO PO Closeout offers a simple, cost effective solution for a common issue in XA. MO PO Closeout has been shown to improve inventory accuracy, and improve the timeliness and accuracy of order-related information. MO PO Closeout is easy to use, easy to learn and quick to implement.
