

Off-Line Pick, Pack & Ship for COM is the latest enhancement developed by Agility, Inc. Off-Line Pick, Pack & Ship automates the picking, packing and shipping transactions within the Customer Order Management (COM) Module and enables real-time COM interaction with custom or third- party packages.

Off-Line Pick, Pack & Ship for COM

- Automates Picking, Packing and Shipping Transactions to the Infor XA COM Module
- Ties third-party pick, pack and ship transactions into the COM module.
- Uses Off-Line Pick, Pack and Ship to create bills of lading, picklists and packlists and more.
- Simplifies transactions in your finished goods and shipping warehouses.

Due to the complexity and architecture of the XA's COM Module, it is difficult to accommodate "off-line" picking, packing and shipping through COM. Agility has applied our extensive knowledge of XA and Data Collection to create a solution that is effective and simple to use. Off-Line Pick, Pack & Ship for COM. Whether you pick from a printed pick list or wish to use a fixed terminal or a data collection device, Off-Line Pick, Pack & Ship can meet your needs. Our goal in creating Off-Line Pick, Pack & Ship was to create a simple, cost-effective solution that can help enhance the performance of your organization.

Call us today to learn about Off-Line Pick, Pack & Ship and other exciting enhancements available through Agility, Inc.

Off-Line Pick, Pack & Ship for COM

Off-Line Pick, Pack & Ship for COM allows users to automate all of the picking, packing and shipping transactions listed below. Transactions can be generated from any number of external sources and then loaded into XA through the PM&C module. Each transaction can additionally call user exits either before or after the transaction is processed. All transactions are edited prior to updating the COM database. Errors are stored and can be corrected and reprocessed.

Infor XA REQUIREMENTS

Required XA Modules: Production Monitor and Control (PM&C), Customer Order Management (COM), Inventory Management (IM), Cross Application Support (CAS)
